

Applications for Competitive SCIIP Grants Received September 2022

Abbeville County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
110	Abbeville, City of	Upper Long Cane Waterline Connection	Construction of a connector waterline between the City of Abbeville and Donalds-Due West Water and Sewer Authority as the first regional effort of the Abbeville County Water Commission.	\$3,450,000	\$500,000
179	Donalds-Due West Water and Sewer Authority	Water System Improvements	Replacement of aging waterlines and installation of a waterline extension to address capacity needs.	\$9,500,000	\$500,000
180	Due West, Town of	Wastewater Treatment Plant Upgrades	Installation of upgrades to the aging wastewater treatment plant components to more effectively treat wastewater while preparing for future growth.	\$1,950,000	\$500,000
190	Starr-Iva Water and Sewer District	Water System Improvements	Replacement of aging infrastructure to address capacity and resiliency and support future growth.	\$8,966,000	\$500,000

Aiken County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
231	Aiken County/Breezy Hill Water and Sewer Company	Water Treatment Plant Improvements	Construction of settling basins at the water treatment plant and addition of a standby generator to increase capacity and provide resiliency.	\$5,941,930	\$0
197	Aiken County	Horse Creek Wastewater Treatment Plant Improvements	Undertake upgrades to aging components at the wastewater treatment plant to satisfy a DHEC consent order related to sludge storage and removal and to increase plant capacity.	\$9,852,300	\$0
232	Aiken, City of	Shaws Creek Water Treatment Plant Expansion	Replacement of the aging surface water treatment plant, rehabilitation of the existing intake and construction of a new administrative facility to increase treatment capacity to accommodate future growth.	\$10,000,000	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

211	Beech Island Rural Community Water and Sewer District	Water System Upgrades and Improvements	Improvement of aged waterlines, generators and well to meet growing demand.	\$9,031,603	\$500,000
215	Burnettown, Town of	Water System Mapping and Sewer Capital Improvement Plan	Completion of two planning components: mapping of the current water system for better operation and management; and examination of the possibility of providing sewer to existing water customers through a capital improvement plan.	\$83,750	\$0
216	Burnettown, Town of	Water System Improvements	Installation of upgrades to the water system with the addition of an elevated storage tank and generators to address a storage deficit.	\$1,463,027	\$103,097
299	Jackson, Town of	Water System Improvements	Implementation of improvements to the water system including a new booster pump station, emergency generators at both well sites and the construction of water main with appurtenances to address pressure, flow and resiliency.	\$3,189,934	\$0
268	New Ellenton Commission of Public Works	Water Improvements	Installation of an additional groundwater well and replacement of water main along several streets to improve water quality.	\$3,451,535	\$0
156	New Ellenton, City of	Sewerage Systems Improvements	Construction of multiple deficiencies of the aged sewer system including pond liners, head works, spray field and pump improvements to allow for more efficient and effective operations and resiliency of the entire sewerage system.	\$3,929,311	\$310,021
036	North Augusta, City of	Sewer Rehabilitation	Rehabilitation of 70+ year-old sewer interceptor lines and brick manholes to reduce infiltration and inflow.	\$7,656,789	\$0

Applications for Competitive SCIIP Grants Received September 2022

225	Salley, Town of	Water Meter and Hydrant Replacement	Replacement of water meters that have exceeded their useful life and the installation of fire hydrants to increase fire protection.	\$618,375	\$109,125
233	Bath Water and Sewer District	Water and Sewerage Rehabilitation	Installation of trenched and trenchless sewer rehabilitation as well as waterline and valve replacements to address aging infrastructure.	\$9,092,221	\$500,000
226	Valley Public Service Authority	Sewerage System Improvement	Replacement of aged lines and backflow preventers as well as the rehabilitation of sewer pipes and manholes in the area.	\$9,222,842	\$0
277	Wagener, Town of	Wastewater Treatment Plant Modifications	Improvements include a new influent bar screen structure, new chemical feed vault and a new chemical building as well as lagoon sludge removal and disposal, which will address a DHEC consent order.	\$959,438	\$0

Allendale County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
207	Allendale, Town of	Wastewater and Collection System Upgrades	Installation of upgrades to a pump station and the wastewater treatment plant to address DHEC violations and consent orders.	\$4,991,625	\$500,000
275	Ulmer, Town of	Water System Improvements	Installation of radio read meters, improvements to the elevated water storage tank, installation of standby generators and new automatic switchover systems at both wells to ensure reliability.	\$474,880	\$83,803

Anderson County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
052	Anderson County/Highway 88 Water Company	Water Main Replacement	Replacement of problematic water mains with new lines to decrease line ruptures.	\$3,262,062	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

030	Anderson County	Hurricane Creek Forcemain Replacement	Replacement of aging and deficient forcemain to increase capacity.	\$7,270,050	\$0
161	Anderson Regional Joint Water System	Lake Hartwell Filter Plant Improvements	Addition of ground storage to the Clemson Booster Pump Station, replacement of on-site disinfection generating equipment and improvements to the existing raw water intake pump station to expand capacity and improve resilience during periods of high demand.	\$10,000,000	\$0
099	Anderson, City of	Generostee Creek Sewer Upgrades	Replacement and upgrade of an undersized and aging trunk sewer along Generostee Creek to increase treatment capacity.	\$10,000,000	\$0
009	Belton, City of	Water Distribution and Sewer Lift Station Replacements Improvements	Replacement of aging, undersized waterlines as well as irreparable lift stations to provide reliable capacity.	\$9,431,585	\$500,000
073	Big Creek Water District	Water System Upgrades	Installation of new water mains to address capacity needs.	\$5,900,000	\$0
017	Broadway Water and Sewerage District	Water Main Replacement	Construction of new water mains to replace aging lines and alleviate pressure issues.	\$6,269,991	\$0
075	Hammond Water District	Water System Upgrades	Construction of an elevated storage tank and new water mains to address capacity needs.	\$8,500,000	\$0
221	Homeland Park Water and Sewer	Water Tank Addition	Construction of pump station upgrades, a ground water storage tank and booster pump station to increase storage capacity.	\$2,342,313	\$234,875
014	Honea Path, Town of	Water Distribution Improvements and Corner Creek Basin Sewer Rehabilitation - Phase 3	Replacement of aging, undersized waterlines to address capacity and rehabilitate sewer lines, which will help reduce line breaks and sanitary sewer overflows.	\$7,341,797	\$500,000

Applications for Competitive SCIIP Grants Received September 2022

298	Iva, Town of	Wastewater Line Grouting	Rehabilitation of sewer main and lines in order to remediate infiltration and inflow.	\$1,275,000	\$225,000
018	Pelzer, Town of	Regional Water Improvements	Improvements to the town's aging water system to facilitate consolidation with Greenville Water, addressing system viability concerns.	\$9,960,035	\$500,000
089	Pendleton, Town of	Pendleton-Clemson Regional Wastewater Treatment Plant Upgrade	Upgrade of an aging wastewater treatment plant to increase capacity for the town, Anderson County and the City of Clemson, which own capacity in the plant and will share in the cost of the improvements.	\$20,000,000	\$0
108	Powersville Water District	Water Mains Replacement and Expansion	Replacement of aging water mains in Pickens County and installation of new water mains in Anderson County along the I-85 Corridor to address commercial growth.	\$10,000,000	\$0
013	Sandy Springs Water District	Water Main Replacement	Construction of new water mains to replace aging lines and alleviate pressure issues.	\$7,693,228	\$0
191	Williamston, Town of	Wastewater Treatment Plant Trunk Line Replacement and Pump Station Upgrade	Replacement of the wastewater treatment plant gravity trunk line and pump station upgrades to address infiltration and inflow issues.	\$1,870,000	\$0
112	Belton-Honea Path Water Authority	Water Treatment Plant Improvements	Installation of new chemical storage and feed systems, flocculation basins and a pump at the existing wastewater treatment plant to upgrade aging infrastructure and improve treatment.	\$5,261,925	\$500,000

Bamberg County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
122	Bamberg Board of Public Works	Interconnection with Orangeburg Department of Public Utilities	Construction of an emergency interconnection with a neighboring utility to increase reliability of the water supply.	\$3,657,550	\$500,000

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

209	Bamberg Board of Public Works	Multi-Project Water and Wastewater	Replacement of sewer lines to reduce infiltration and inflow, headworks rehabilitation and a waterline extension to serve a community that is experiencing well issues.	\$8,497,190	\$500,000
031	Bamberg County	Elevated Water Tank Rehabilitation	Rehabilitation of the interior and exterior of an aging elevated storage tank.	\$499,375	\$63,125
192	Denmark, City of	Wastewater System Improvements	Construction of improvements at the wastewater treatment plant including sludge removal, headworks, pump station and spray field to address DHEC requirements.	\$8,850,000	\$500,000
316	Olar, Town of	Water System Improvements	Replacement of aging water mains and lead seals as well as a new generator and water meters.	\$500,000	\$10,000

Barnwell County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
032	Barnwell, City of	New Elevated Tank and Wastewater Rehabilitation	Addition of a new elevated storage tank, installation of new sewer line and lining manholes to increase system resilience.	\$5,199,688	\$500,000
210	Barnwell, City of	Wastewater Service Expansion	Construction of a pump station and nine miles of sewer force main to increase capacity to serve an industrial park that will support future growth.	\$10,000,000	\$0
286	Blackville, Town of	Wastewater Treatment Facility Improvements	Replacement of existing equipment and treatment process upgrades necessary to address a DHEC consent order.	\$8,936,191	\$500,000
218	Elko, Town of	Waterline Replacement	Replacement of aging waterlines south of US 78 that are experiencing leaks and breaks.	\$993,486	\$100,320
184	Hilda, Town of	2nd Old Jack Road Well	Construction of a second Old Jack Road well since the only other well in operation is experiencing issues.	\$691,467	\$122,023

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

227	Williston, Town of	Water and Sewerage System Improvements	Construction of upgrades to the water and sewer systems to prepare for emergencies.	\$8,613,633	\$500,000
-----	--------------------	--	---	-------------	-----------

Beaufort County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
178	Beaufort, City of	Drainage Improvements	Provision of upgraded capacity to severely undersized roadway drainage systems and installation of a stormwater pumping station at the outfall to provide flood resiliency from both rainfall and tidal flooding.	\$9,460,299	\$0
235	Beaufort-Jasper Water and Sewer Authority	Jasper County and Hardeeville Sewer System Improvements	Construction of sewer improvements to allow better service for current customers of the system and expand capacity to facilitate further development.	\$13,960,301	\$0
236	Beaufort-Jasper Water and Sewer Authority	May River Watershed Sewer Master Plan - Phase I	Installation of a vacuum sewer system to eliminate the environmental impacts of failing septic tanks.	\$5,925,000	\$0
237	Beaufort-Jasper Water and Sewer Authority	Water System Improvements	Improvements to allow for increased pressure and flow to meet current requirements and expand capacity for future development.	\$8,127,750	\$0
177	Beaufort-Jasper Water and Sewer Authority	Jasper County Water and Sewer Improvements	Replacement of galvanized water mains and an older residential grinder pump station system with gravity sewer and a new larger pump station to provide more reliable service.	\$8,373,783	\$0
234	Beaufort-Jasper Water and Sewer Authority	Wastewater Pump Stations Upgrades	Rehabilitation of two aging and deteriorating regional wastewater pump stations and construction of an associated ground storage tank.	\$10,000,000	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

126	Broad Creek Public Service District	Wastewater Treatment Plant Upgrades	Implementation of upgrades at the wastewater treatment plant to provide resiliency from an aging electrical system and acts of natural disasters.	\$5,862,093	\$0
125	Broad Creek Public Service District	Water Distribution and Capacity Upgrades	Construction of a new aquifer storage and recovery well, new groundwater well and electrical upgrades at the booster pump station to provide resilience and storm protection and increased capacity.	\$10,000,000	\$0
164	Fripp Island Public Service District	Emergency Bridge and Water Infrastructure Improvements	Rehabilitation of a deteriorating bridge and a waterline attached to it, which ensures clean water to all residents and businesses.	\$1,734,000	\$0
035	Hilton Head Island, Town of	Stormwater Pump Station Upgrade	Construction of stormwater pump station upgrades to ensure an increased level of reliability during and after a storm event.	\$3,362,735	\$0
025	Hilton Head Public Service District	Reverse Osmosis Water Treatment, Aquifer Storage and Recovery	Expansion of the current reverse osmosis water treatment plant and other system improvements to create resiliency of the public water supply.	\$10,000,000	\$0
170	Port Royal, Town of	Stormwater Infrastructure Improvements	Installation of stormwater infrastructure where it does not currently exist or is undersized and failing.	\$740,176	\$0

Berkeley County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
238	Berkeley County	Central Berkeley Wastewater Treatment Plant Expansion	Expansion of the existing wastewater treatment facility from 6 million gallons per day to 9 million gallons per day to support unprecedented growth in the area.	\$10,000,000	\$0
239	Berkeley County	Rural Water Service Lines	Construction of thirty miles of waterlines to provide safe potable water and promote economic opportunity in a rural area currently relying on problematic old wells.	\$10,000,000	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

240	Berkeley County	Upper Berkeley Wastewater Treatment Plant Expansion	Expansion of the existing wastewater treatment facility to 3 million gallons per day to increase capacity to serve projected growth.	\$10,000,000	\$0
041	Goose Creek, City of	Water System Expansion - South	Installation of a new water main to provide water to a new area, increase fire service and loop the water system on the south side of the City.	\$1,830,034	\$0
083	Jamestown, Town of	Water Tank Upgrade	Upgrade the elevated water tower to comply with several federal agency requirements.	\$318,750	\$56,250
066	Moncks Corner Water Works	Improvement of Water and Wastewater System	Replacement of 50+ year-old aging infrastructure to include waterlines, wastewater pump stations and the wastewater treatment plant.	\$6,954,598	\$0
065	Moncks Corner, Town of	Drainage Basin Improvements	Installation of swales and culvert improvements in a drainage basin to improve stormwater flows and prevent flooding.	\$462,926	\$0

Calhoun County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
198	Calhoun County	Waterline Extension	Installation of approximately 15 miles of water mains and appurtenances to serve residential and commercial development.	\$10,000,000	\$0
148	St. Matthews, Town of	Wastewater System Improvements	Replacement of aged water and sewer infrastructure to allow for a more sustainable and resilient system for the long term.	\$2,957,106	\$221,842

Charleston County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
111	Awendaw, Town of	Waterline Extension	Extension of waterlines to serve new and existing customers as well as improve system sustainability and operational requirements.	\$7,260,000	\$500,000

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

127	Charleston County	Central Park Road Drainage Culvert Improvements	Replacement of aging and undersized culverts and elevation of a well-trafficked road to address frequent flooding leading to road closures.	\$3,414,400	\$0
217	Charleston Regional Resource Recovery Authority	Regional Compost Facility	Development of a biosolids composting facility that will serve four wastewater treatment plants across three utilities, addressing the increasing difficulty and expense of sludge disposal.	\$10,000,000	\$0
053	Charleston Water System	Sewer Tunnel Extension	Extension of an existing wastewater tunnel system to provide more capacity and reduce the potential for a major environmental incident.	\$10,000,000	\$0
152	Charleston, City of	King Street Pump Station	Construction and installation of a pump station and generator at the intersection of King and Huger Streets in downtown to mitigate chronic flooding risks.	\$10,000,000	\$0
206	Folly Beach, City of	Stormwater and Utility Improvements	Replacement of 50 year-old water main to improve water quality and add piping and ditching to the stormwater system to improve resiliency.	\$8,161,700	\$500,000
201	Hollywood, Town of	Sewer System Infrastructure Upgrades	Replacement or repair of aging manholes and pump station parts.	\$4,145,535	\$0
046	Isle of Palms Water and Sewer Commission	Water Infrastructure Modernization and Resilience	Construction of water system improvements to comply with a DHEC consent order and sewer system upgrades to protect public health and the environment.	\$4,576,256	\$0
072	Isle of Palms, City of	Stormwater Infrastructure Improvements	Construction of storm water infrastructure to eliminate flooding and ensure the health and safety of residents.	\$5,445,953	\$500,000
061	James Island Public Service District	Harbor View Road Capacity Upgrade Project	Construction of a new, larger sewer force main to increase capacity and provide a backup for the aging force main that is currently in use.	\$7,482,572	\$0

**Some titles and descriptions have been edited for clarity.*

Applications for Competitive SCIIP Grants Received September 2022

113	James Island Public Service District	Public Sewer Expansion	Installation of on-site grinder pumps and low-pressure force mains to reduce the water contamination caused by fecal bacteria from older septic tank systems.	\$8,759,987	\$0
168	Lincolnton, Town of	Waterline Replacement	Replacement of aging waterlines and meters in three areas of the town.	\$2,109,977	\$196,773
266	Mount Pleasant Waterworks	Snowden Gravity Wastewater Extension - Phase 3	Implementation of a collaborative effort between Charleston County and Mount Pleasant Waterworks to extend public sewer services to residents currently using septic tanks.	\$3,000,000	\$0
142	Mount Pleasant Waterworks	Septic Tank Abatement	Elimination of septic tanks to address water quality issues and extend gravity wastewater lines to provide public wastewater service to a historic community.	\$10,000,000	\$0
267	Mount Pleasant, Town of	Stormwater Infrastructure Improvement	Construction of drainage infrastructure within a watershed to alleviate frequent flooding and poor drainage within the area.	\$6,012,131	\$0
022	North Charleston Sewer District	Northwoods and Popperdam Pump Station Upgrades	Renovation of two pump stations that serve over 43% of the district's customers, which will replace aging infrastructure, increase capacity and reduce sanitary sewer overflows.	\$9,994,809	\$0
023	North Charleston, City of	Raymond Avenue Drainage	Construction of a storm pipe and drainage ditch system to address frequent flooding that affects residents and an elementary school.	\$614,062	\$0
042	North Charleston, City of	Accabee Drainage - Phase 3	Stormwater improvements to address yard and road flooding in a residential neighborhood.	\$712,735	\$0
024	North Charleston, City of	Read Street Drainage	Installation of stormwater improvements to address localized, recurring street and yard flooding in a residential area.	\$728,437	\$0

**Some titles and descriptions have been edited for clarity.*

Applications for Competitive SCIIP Grants Received September 2022

029	North Charleston, City of	Bentwood, Northwoods and Ingleside Drainage	Installation of a culvert and a retention pond to alleviate frequent flooding in a residential area.	\$2,021,373	\$0
004	North Charleston, City of	Chicora Avenue Drainage	Installation of stormwater improvements to help alleviate localized, recurring street flooding problems during heavy rain events.	\$2,562,237	\$0
008	North Charleston, City of	Union Heights Drainage	Improvements to stormwater facilities to address frequent flooding in a residential neighborhood.	\$4,590,581	\$0
043	Ravenel, Town of	Sewer Force Main Extension and Pump Station Upgrade	Extension of a sewer force main to convey wastewater directly to Charleston Water System for treatment and provide capacity for planned developments.	\$7,564,815	\$500,000
044	Seabrook Island Utility Commission	Wastewater Improvement Program	Wastewater treatment plant improvements to increase capacity and replace aging infrastructure.	\$10,000,000	\$336,000
311	Sullivan's Island, Town of	Drainage Improvements	Replacement and upgrade of 60 year-old drainage outfalls and ancillary lateral lines to provide capacity upgrades in addition to water quality benefits.	\$8,758,775	\$500,000

Cherokee County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
078	Blacksburg, Town of	Water and Sewer System Improvements	Replacement of waterlines and the installation of two booster pump stations to improve pressure and fire service. Upgrades to sewer pump stations and the wastewater treatment plant to address capacity, service interruption and environmental concerns.	\$6,374,936	\$500,000
038	Cherokee County/Grassy Pond Water Company	Water Capacity Improvements	Construction of a new storage tank, upgrades to a pump station and replacement of two aging waterlines to address capacity issues.	\$6,542,035	\$500,000
131	Daniel Morgan Rural Community Water District	Waterline and Meter Replacement	Replacement of aging waterlines to address flow and pressure problems and installation of meters with automatic readers to enhance efficiency.	\$2,812,165	\$496,264

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

001	Gaffney Board of Public Works/Macedonia Water Works	Water System Improvements	Installation of tank, pump station and piping improvements to increase the capacity of a recently acquired small, rural water company.	\$10,000,000	\$0
-----	---	---------------------------	--	--------------	-----

Chester County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
054	Chester County Wastewater Recovery	Rock Hill Wastewater Treatment Connection	Construction of a sewer force main to carry wastewater from the eastern part of Chester County to the City of Rock Hill system to expand treatment capacity.	\$10,000,000	\$500,000
074	Chester Metropolitan District	Hemphill Water Treatment Plant Renovation	Rehabilitation of the water treatment plant to bring it up to current standards and increase reliability and resiliency.	\$10,000,000	\$500,000
251	Fort Lawn, Town of	Wastewater Infrastructure Upgrade	Replacement of sewer force main and pump station to address infiltration and inflow.	\$4,531,500	\$472,000
082	Great Falls, Town of	Collection System Upgrades	Replacement of a portion of the influent gravity line, improvements to the influent pump station and the expansion of sewer to serve an existing business. The project also includes replacement of wastewater lines downtown to serve three existing mill sites and prepare for future development.	\$8,822,847	\$500,000

Chesterfield County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
128	Cheraw, Town of	Water and Sewer System Improvements	Improvements and upgrades to the existing wastewater treatment plant, water treatment plant and the sewer collection and water distribution systems.	\$10,000,000	\$500,000

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

019	Chesterfield County/Alligator Rural Water and Sewer Company	Regional Water Production Capacity	Improvements to increase well production and storage in response to increased demand from Chesterfield County Rural Water Company.	\$8,715,881	\$0
020	Chesterfield County/Chesterfield Rural Water Company	Regional Water Distribution Capacity	Capacity improvements to allow greater storage and distribution of water purchased from Alligator Rural Water and Sewer Company to accommodate growth.	\$10,000,000	\$0
129	Chesterfield, Town of	Chesterfield County Water and Sewer Impact Study	Implementation of a comprehensive study of water and sewer systems in Chesterfield County to determine if a county water and sewer authority is needed.	\$460,000	\$0
256	Jefferson, Town of	Water and Sewer System Upgrades	Replacement of water and sewer lines as well as manholes to address a DHEC consent order.	\$10,000,000	\$500,000
264	McBee, Town of	Water System Upgrade	Installation of a new water metering system and a generator to improve operational efficiencies and well upgrades to provide redundancy.	\$622,500	\$0
051	Pageland, Town of	Waterline Development	Extension of a sewer line to US 601 at Laney Road to serve a developing subdivision, industrial park and nearby industries.	\$1,208,125	\$352,864
050	Pageland, Town of	Eagles Crest Sewer	Replacement and upgrade of existing sewer line manholes to Central High School and the extension of sewer lines to serve a new subdivision.	\$1,320,532	\$0

Clarendon County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
055	Clarendon County	Water Improvement Project - Phase IV	Extension of lines in the southern part of the county to provide new connections for existing subdivisions.	\$9,501,849	\$0
056	Clarendon County	Water Improvement Project - Phase V	Extension of the county water system to connect two nearby utilities and Camp Bob Cooper.	\$10,000,000	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

187	Manning, City of	Downtown Sewer Line Replacement	Replacement of 100 year-old gravity sewer lines in the downtown area.	\$8,563,510	\$500,000
312	Summerton, Town of	Goat Island Sewer System Improvements	Construction of sewer force main and three pump stations to convey wastewater from Goat Island to the town, which would allow extension of sewer service to a townhouse complex with a defunct private sewer system.	\$6,921,875	\$0
274	Summerton, Town of	Water and Sewer Infrastructure Improvements	Rehabilitation of aging infrastructure including trunk sewer lines, addition of a new elevated tank, well, fire hydrants and water meter replacements.	\$5,158,703	\$500,000

Colleton County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
293	Edisto Beach, Town of	Wastewater System Upgrades	Construction of upgrades to the wastewater system to include the treatment plant, pump stations and force mains to address identified problems, prevent poor quality effluent and eliminate wastewater overflows.	\$8,904,385	\$500,000
282	Walterboro, City of	Northwest Sewer Improvements	Extension of new gravity sewer and upgrades of an existing trunkline to increase wastewater capacity and allow for industrial, commercial and residential growth.	\$10,000,000	\$500,000

Darlington County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
246	Darlington County Water and Sewer Authority	Sewer Pump Stations Renovation	Rehabilitation of six aging sewer pump stations to improve reliability.	\$1,944,460	\$0
244	Darlington County Water and Sewer Authority	Ruby Raw Waterlines and Valves	Replacement of aged raw water mains and pressure reducing valves, for which replacement parts are no longer available.	\$3,042,426	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

245	Darlington County Water and Sewer Authority	SCADA Monitoring System	Installation of a SCADA monitoring system at the central command center and Center Road water treatment plant.	\$3,444,880	\$0
322	Darlington, City of	Highway 34 Sewer Pump Station	Installation of a new sewer pump station to eliminate the existing suspended gravity sewer line crossing Black Creek which is susceptible to breaks.	\$564,400	\$0
324	Darlington, City of	Wastewater Treatment Plant Basins Rehabilitation	Removal and replacement of filtration materials at the wastewater treatment plant due to excessive infiltration and inflow during rainfall events.	\$699,465	\$0
320	Darlington, City of	E. Darlington Gravity Sewer Expansion and Pump Station Elimination	Elimination of a substandard pump station and extension of gravity sewer to an area on septic tanks.	\$1,378,955	\$0
321	Darlington, City of	Fire Hydrants Replacement	Replacement of several outdated fire hydrants to improve fire insurance ratings and minimize repairs.	\$1,462,510	\$0
323	Darlington, City of	Sewer Pump Stations Renovations	Replacement of seven sewer pump stations that have exceeded their useful life and are undersized for current needs.	\$1,647,215	\$0
319	Darlington, City of	Broad Street Storm System Upgrade	Improvements and upgrades to the existing drainage system to eliminate flooding issues along Broad Street.	\$2,575,479	\$0
295	Hartsville, City of	Water and Wastewater Improvements	Installation of sewer improvements to increase capacity as well as construction of a well, water treatment facility and storage tank to replace aging infrastructure.	\$8,500,000	\$500,000
115	Lamar, Town of	Railroad Pump Station Upgrades	Abandonment and upgrade of a pump station including installation of gravity sewer lines and rehabilitation of existing manholes.	\$942,438	\$44,188

Dillon County

April 2023 Board Meeting

Applications for Competitive SCIIP Grants Received September 2022

057	Dillon County/Trico Water Company	Latta Water Treatment Plant Replacement and New Groundwater Wells	Replacement of an aging water treatment plant and construction of new groundwater wells, a raw waterline and a booster pump station to meet capacity needs.	\$9,663,166	\$0
288	Dillon, City of	Water and Wastewater Improvements	Upgrade water meters to improve operational efficiencies and upgrade the wastewater system to increase capacity.	\$10,000,000	\$500,000
155	Latta, Town of	Water System Upgrades	Replacement of aging waterlines to improve water quality and distribution.	\$10,000,000	\$500,000

Dorchester County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
292	Dorchester County	Pump Station 4 and Force Main Upgrades	Replacement of a pump station and force main to improve reliability.	\$10,000,000	\$0
289	Dorchester County	Jedburg Road Water Distribution and Wastewater System Improvements	Installation of new water main, fire hydrants, pump station and sewer force main to serve an industrial site.	\$1,472,588	\$0
290	Dorchester County	New Water Main from I-95 Well and Tank to I-26 and US Hwy 15 Interchange	Construction of new water main and fire hydrants to serve potential economic growth at interchange.	\$3,750,000	\$0
291	Dorchester County	University Park Water Distribution and Wastewater System Improvements	Improvements to aging water and sewer lines in a residential area.	\$6,132,975	\$0
163	Dorchester County	Water Interconnection to Ridgeville - Phase I	Installation of waterline along Highway 27 to improve resiliency and allow for growth.	\$8,665,407	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

247	Dorchester County Water Authority	Summers Corner/Watson Hill Water Improvements	Construction of a one million gallon elevated water storage tank and water main to provide storage and redundancy.	\$8,727,000	\$0
107	Harleyville, Town of	Wastewater System Improvements	Installation of upgrades at the wastewater treatment facility and pump station as well as re-route the force main to increase wastewater capacity and serve a growing area.	\$3,021,069	\$0
309	St. George, Town of	Asset Management Program and GIS Mapping	Establishment of an asset management program for the water system, including an inventory of the system using GIS location of assets and other data collection.	\$610,000	\$0
310	St. George, Town of	New Tank and Well	Construction of new water storage tank and water production well to increase capacity to serve existing customers as well as a recently purchased parcel slated for development.	\$2,565,356	\$470,869
069	Summerville Commissioners of Public Works	Sawmill Branch Water Supply, Pumping and Storage Improvements	Construction of two one-million-gallon ground storage tanks, a triplex booster pump station, water transmission main and an elevated tank to increase redundancy and capacity.	\$7,280,000	\$0
016	Summerville, Town of	Springview Lane Drainage Improvements	Construction of a detention stormwater pond to mitigate flooding in the area.	\$340,422	\$0

Edgefield County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
317	Edgefield County	Barton Road Drainage Improvements	Improvements to include ditch grading, culvert installation, rip rap armoring and construction of a retention pond as well as an enhanced swale along Barton Road to prevent flooding and erosion.	\$950,747	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

034	Edgefield County Water and Sewer Authority	Water Treatment Plant Upgrades	Replacement of aging components of the water treatment plant to meet capacity needs.	\$10,000,000	\$0
181	Edgefield, Town of	Gymnasium Stormwater Improvements	Conduct a flood study, provide stream bank stabilization, upgrade the existing sanitary sewer system and construct a retaining wall to prevent extreme flooding of the Town's gymnasium facility.	\$790,000	\$0

Fairfield County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
200	Fairfield County/Mid County Water Company	Water Meter Replacement	Installation of new water meters to increase efficiencies and improve operating costs.	\$591,812	\$54,438
182	Fairfield Joint Water and Sewer System	Ridgeway Sewer System Connector	Installation of a new pump station and force main to allow industrial waste to be pumped from the Ridgeway wastewater treatment plant to a regional pump station and a soon-to-be constructed regional wastewater treatment plant, which will provide increased capacity for the county.	\$9,539,145	\$0
249	Fairfield Joint Water and Sewer System	Winnsboro Sewer System Connector	Installation of a new regional pump station and force main to connect to the Winnsboro wastewater treatment plant to provide sewer service to a new industrial park.	\$10,000,000	\$0
172	Ridgeway, Town of	Water Meter Replacement	Upgrade water meters, utility billing and customer payment processes with new technology and equipment to increase efficiencies and improve operating costs.	\$308,420	\$0
070	Winnsboro, Town of	Water Treatment Plant Upgrade and Expansion	Provision of increased water treatment plant capacity to accommodate increased raw water flows and address potential growth in Blythewood and the I-77 industrial corridor.	\$10,000,000	\$500,000

Florence County

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
130	Coward, Town of	Water Improvements Project	Installation of new waterlines, a regional connection and the replacement of two wells to address capacity issues.	\$8,368,973	\$0
325	Florence, City of/Florence County	Deer Road Water Main Extension	Installation of new water mains and fire hydrants to serve the Deer Road area whose residents are currently on wells.	\$2,526,791	\$0
250	Florence County	Drainage Improvements	Installation of additional outfalls and upgrades to an existing drainage system on six streets in the county.	\$3,732,023	\$0
058	Florence, City of	Water System Improvements	Improvements to the Pine Street, GE, River Road and Oakdale water treatment plants as well as waterline improvements in the West Florence area.	\$9,908,062	\$0
138	Johnsonville, City of	Wastewater Treatment Plant Upgrade	Upgrade the wastewater treatment plant, Pump Station 3 and force main to improve water quality.	\$2,927,655	\$500,000
202	Lake City, City of	Wastewater Improvements	Construction of wastewater improvements including sewer line rehabilitation and wastewater treatment plant headworks improvements.	\$8,402,250	\$0
157	Olanta, Town of	Water Improvements	Installation of new waterlines and a regional connection to the Barrineau Public Utilities Water System to improve reliability.	\$9,990,192	\$0
158	Pamplico, Town of	Water Improvements	Installation of new waterlines and connections to the Coward Water System to improve system resiliency and water quality issues.	\$9,887,634	\$0
160	Scranton, Town of	Water System Improvements	Construction of an elevated storage tank to improve system capacity and resiliency.	\$8,428,449	\$0

Georgetown County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
208	Andrews, Town of	Water and Sewer Improvements Project	Construction of infrastructure improvements to improve deficiencies in the water and sewer system.	\$6,166,900	\$500,000

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

165	Georgetown County	Highway 17 Drainage Improvements	Installation of three new outfalls under Highway 17 in the Litchfield Drive area and upgrades to upstream drainage systems.	\$2,947,905	\$0
059	Georgetown County Water and Sewer District	Hwy 701 Corridor Water Regionalization	Interconnections with several water systems to improve water quality and prepare for emergencies.	\$10,000,000	\$0
060	Georgetown County Water and Sewer District	Water System Improvements	Installation of a new raw water intake and expansion of a water treatment plant to address growth and provide a new elevated water storage tank and transmission main to interconnect two systems.	\$10,000,000	\$0
081	Georgetown, City of	Sewer Improvements Project	Replacement and upgrades of the existing pump station facility and sewer force main to address aging infrastructure.	\$9,733,738	\$500,000
223	Pawleys Island, Town of	Tidal Flooding Mitigation	Installation of stormdrain backflow preventers to reduce the severity and extent of flooding across the island.	\$210,000	\$0
026	Rural Community Water District of Georgetown County	System-wide Water Improvements	Construction of a new elevated water tank, groundwater well and new water main to meet projected needs.	\$4,920,756	\$500,000

Greenville County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
252	Fountain Inn, City of	Durbin Creek Basin Sanitary Sewer Rehabilitation	Rehabilitation of clay sewer pipes and laterals via cured-in-place pipe lining and excavation of brick manholes to address wet-weather sanitary sewer overflows.	\$9,999,075	\$0
134	Greenville County	Drainage Improvements at the Reedy River	Improvement of two streams and construction of a stormwater wetland as part of a larger, multi-organizational effort to improve water quality in the Reedy River Watershed.	\$10,000,000	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

010	Greenville County/Blue Ridge Rural Water Company	Water System Improvements	Construction of new water mains, elevated storage tank and a higher capacity pumping station to address pressure issues.	\$9,118,123	\$0
003	Greenville Water	Adkins Water Treatment Plant Parallel Water Transmission Main - Phase One	Construction of two critical segments of the Adkins parallel potable water transmission main from Adkins Water Treatment Plant to Cedar Rock storage tanks to add redundancy.	\$10,000,000	\$0
220	Greenville, City of	South Downtown Sewer Improvements	Installation of new sewer lines to increase system capacity.	\$3,930,495	\$0
105	Greer Commission of Public Works	Gibbs Shoals Area Sewer Improvements	Construction of new gravity sewer infrastructure to increase capacity and protect stream water quality.	\$10,000,000	\$0
305	Mauldin, City of	Basin RG2 Sanitary Sewer Rehabilitation	Rehabilitation of clay sewer and laterals via cured-in-place pipe lining and brick manholes to address wet-weather sanitary sewer overflows.	\$3,399,750	\$0
063	Metropolitan Sewer Subdistrict	Dunean Mill Village Sewer Rehabilitation - Phase I	Rehabilitation of the sewer collection system in the Dunean Mill Village, which has reached the end of its useful life. This area was part of the Parker Sewer and Fire Subdistrict that has recently been consolidated into MetroConnects.	\$10,000,000	\$0
064	Metropolitan Sewer Subdistrict	Mills Mill Village Sewer Rehabilitation	Rehabilitation of the sewer collection system in the Mills Mill Village to address sanitary sewer overflows in the aging system. This area was part of the Parker Sewer and Fire Subdistrict that has recently been consolidated into MetroConnects.	\$10,000,000	\$0
224	ReWa	Swamp Rabbit Gravity Sewer Upgrades	Installation of increased capacity in the existing gravity system and relocation of pipe to accommodate current and future flows.	\$10,000,000	\$0

**Some titles and descriptions have been edited for clarity.*

Applications for Competitive SCIIP Grants Received September 2022

272	Simpsonville, City of	Lower Reedy Basin Sanitary Sewer Rehabilitation	Rehabilitation of clay sewer via cured-in-place pipe lining and excavation of brick manholes and clay service laterals to address wet-weather sanitary sewer overflows.	\$9,997,625	\$0
171	ReWa	Pelzer and West Pelzer Sewer Consolidation Improvements	Improvements to aging sewer systems, which were acquired by ReWa to provide for adequate operation and maintenance.	\$10,000,000	\$0

Greenwood County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
135	Greenwood Commissioners of Public Works	Water System Improvements	Replacement of aging cast iron and galvanized water mains to improve water quality and distribution.	\$10,000,000	\$0
102	Greenwood Metropolitan District	Sewer System Improvements Phase I	Upgrade aging components at a wastewater treatment plant, rehabilitation of aging sewer lines and trunk line through phase one to meet capacity needs and improve water quality.	\$10,000,000	\$500,000
318	Greenwood Metropolitan District	Sewer System Improvements Phase II	Construction of upgrade to the Coronaca Creek trunk line through phase II, upgrade Rocky Creek trunk line and install a septage receiving station at the wastewater treatment plant to meet capacity needs and improve water quality.	\$10,000,000	\$0
076	Ninety Six Commission of Public Works	Viability Study	Implementation of several planning efforts including mapping, inspections of the wastewater system, development of a capital improvement plan and asset management plan as well as pressure/flow monitoring and hydraulic modeling.	\$930,500	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

103	Ware Shoals, Town of	Water and Sewer Viability Planning	Implementation of mapping, inspections of the wastewater system, development of capital improvement and asset management plans, pressure/flow monitoring and hydraulic modeling.	\$600,000	\$0
104	Ware Shoals, Town of	Wastewater Treatment Plant Improvements	Replacement of aging components at the wastewater treatment plant and pump station as well as installation of sludge disposal technology and reinforcement around the aeration basin to meet compliance standards.	\$5,950,000	\$500,000

Hampton County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
248	Estill, Town of	Wastewater Improvements	Improvements to 50+ year-old infrastructure to include expansion of a wastewater treatment plant trunk line, replacement of gravity line for a pump station and upgrades and replacement to a pump station.	\$2,652,175	\$475,000
139	Lowcountry Regional Water System	Industrial Area Wastewater Treatment Capacity Improvements	Construction of a wastewater treatment plant with the capability to be expanded in the future for needed capacity to support economic growth.	\$10,000,000	\$500,000
185	Lowcountry Regional Water System	Industrial Area Water Improvements	Construction of water transmission main and a new elevated storage tank to provide capacity to support economic growth and meet regulatory requirements.	\$10,000,000	\$500,000
280	Scotia, Town of	Fire Protection Improvements	Construction of a raised water tank and fire hydrants for improved fire protection.	\$1,014,000	\$190,000

Horry County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
037	Aynor, Town of	Southside Drainage Improvements	Drainage improvements to mitigate flooding.	\$500,000	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

214	Briarcliffe Acres, Town of	Viability Planning and Stormwater System Assessment	Assessment of the town's stormwater drainage system including opportunities for improvements to address flooding issues.	\$350,000	\$0
243	Conway, City of	Kingston Lake Stormwater Outfall Upgrades	Construction of drainage upgrades to several outfalls that are draining to a populated area of central Conway.	\$10,000,000	\$0
219	Grand Strand Water and Sewer Authority	Bull Creek Surface Water Treatment Plant Expansion	Expansion of the Bull Creek Surface Water Treatment Plant from 45 million gallons per day to 60 million gallons per day to meet growth demand.	\$10,000,000	\$0
255	Horry County	Drainage Improvements in Unincorporated Areas	Construction of stormwater projects designed to address resilience and storm protection in five areas of the county.	\$6,516,963	\$0
254	Horry County/Bucksport Water System	Bucksport Water System - Phase XII	Installation of a new well, reverse osmosis treatment system, a 100,000 gallon ground storage water tank, booster pump station and a 500,000 gallon elevated storage water tank and pressure valves to improve water quality and capacity.	\$9,146,600	\$0
261	Loris, City of	Viability Planning	Evaluation of the existing conditions of the water and wastewater systems and analysis of current performance, upcoming needs, alternates and recommendations regarding future viability.	\$625,000	\$0
186	Loris, City of	Water and Sewer System Upgrades	Construction of upgrades to three gravity sewer trunk lines and replacement of the water meters, which are aging.	\$4,538,667	\$500,000
021	Myrtle Beach, City of	Parallel Water Transmission Line - Phase I	Construction of a new water transmission main to meet projected water demands in Myrtle Beach and North Myrtle Beach.	\$10,000,000	\$0

**Some titles and descriptions have been edited for clarity.*

Applications for Competitive SCIIP Grants Received September 2022

088	North Myrtle Beach, City of	Water Transmission Improvements	Replacement of aging control systems at the booster pump station and installation of a ground storage tank and water transmission pipeline to improve reliability.	\$10,050,000	\$0
-----	-----------------------------	---------------------------------	--	--------------	-----

Jasper County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
300	Jasper County	Drainage Improvements	Installation of curb and gutter, storm drainage infrastructure and erosion control to address the health and safety of residents due to extreme flooding.	\$1,827,338	\$0
068	Ridgeland, Town of	Water Meters and Water Reclamation Facility Aerator Replacement	Conversion of existing, manually-read water meters to automated meters and the replacement of broken, 30 year-old aerators at the Water Reclamation facility.	\$839,503	\$0

Kershaw County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
212	Bethune, Town of	Water Tank Rehabilitation Project	Rehabilitation of the existing elevated water storage tank with new interior and exterior coating system to ensure structural preservation and water quality.	\$409,642	\$69,375
241	Camden, City of	Water System Upgrades	Installation of a new 500,000 gallon elevated tank, new booster pump station and the replacement of pipe to address aging infrastructure and meet to storage requirements.	\$10,000,000	\$0
228	Kershaw County/Bethune Rural Water Company	Water System Improvements	Construction of a new elevated water tank, groundwater supply well and installation of an emergency standby generator to improve redundancy.	\$4,559,625	\$500,000

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

301	Kershaw County	Wastewater Treatment Plant Improvements and Expansion	Expansion of the existing Kershaw County/Lugoff wastewater treatment facility to 4 million gallons per day to meet current and future demand.	\$10,000,000	\$0
167	Kershaw County and Lee County Regional Water Authority	New Waterlines and Elevated Tank	Installation of waterlines and an elevated water tank to serve new development including two subdivisions.	\$10,000,000	\$0

Lancaster County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
296	Heath Springs, Town of	Sewer Outfall Replacement	Replacement of 50 year-old gravity sewer line and manholes to reduce infiltration and inflow.	\$2,975,000	\$500,000
258	Lancaster County	Multiple Road Drainage Improvements	Improvements for eighteen stream road crossings to replace the existing culverts with larger capacity box culverts and address significant flooding.	\$8,169,699	\$0
303	Lancaster County Water and Sewer District	Riverside Road Regional Water Transmission	Installation of water main to address redundancy/reliability and additional system capacity needs to meet regional water demands.	\$10,000,000	\$0
259	Lancaster, City of	Wastewater Treatment Plant Optimization and Flood Proofing	Optimization of the existing wastewater treatment plant to include replacement of an existing influent pump station and headworks located in a floodplain.	\$10,000,000	\$0

Laurens County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
039	Clinton, City of	Miller's Fork Basin Sewer Rehabilitation	Rehabilitation of aging sewer lines to prevent sanitary sewer overflows and to satisfy an existing DHEC consent order.	\$4,250,000	\$500,000
166	Gray Court, Town of	New Sewer System	Construction of a new gravity sewer pump station and force main to provide sewer service to Main Street, which currently does not have public sewer infrastructure.	\$1,763,000	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

047	Laurens Commission of Public Works	Water System Improvements	Construction of a new water tank, as well as water treatment plant and waterline upgrades that will allow decommissioning of booster pumps stations and multiple water tanks to address water pressure problems.	\$10,000,000	\$500,000
084	Laurens County Water and Sewer Commission	Hospital Area Water System Improvements	Construction of booster pump stations, an elevated water tank and waterline improvements to increase water capacity and reliability in the hospital service area.	\$7,922,850	\$0

Lee County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
077	Bishopville, City of	Water and Wastewater Upgrades	Construction of a water tank, upgrade and replacement of waterlines as well as improvements to the wastewater treatment plant and upgrade of a pump station to meet state requirements.	\$8,496,855	\$500,000
229	Lynchburg, Town of	Waterline Extension and Interconnection of Back Swamp Waterlines	Installation of water main to loop with an existing line as well as extension of service outside of town limits.	\$1,144,620	\$126,992

Lexington County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
045	Batesburg-Leesville, Town of	Regional Connection to Finished Water Supply	Construction of a water main and booster pump station to connect to a new source of finished water, which will address an existing DHEC consent order and provide a more reliable source of water.	\$10,000,000	\$500,000
242	Cayce, City of	Avenues Drainage Improvements	Installation of storm drainage improvements in the Avenues neighborhood to address persistent flooding.	\$10,000,000	\$0
287	Chapin, Town of	East Chapin Forcemain	Construction of sanitary sewer force mains to accommodate current capacity needs.	\$7,416,244	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

183	Gaston Rural Community Water District	Water Distribution Upgrades	Construction of new and upsized waterlines, a new elevated water storage tank and well to increase capacity for future growth.	\$4,278,688	\$0
253	Gilbert-Summit Rural Water District	Water Treatment, Supply, Storage and Conveyance Improvements	Construction of multiple well upgrades, installation of a ground water storage tank and replacement of an aging water main to improve water quality and conveyance.	\$9,616,356	\$500,000
114	Joint Municipal Water and Sewer Commission	Water System Expansion to Batesburg-Leesville	Installation of a waterline, booster pump station and elevated water tank to connect the Town of Batesburg-Leesville's system to the Joint Municipal Water and Sewer Commission and satisfy an existing DHEC consent order.	\$10,000,000	\$0
260	Lexington, Town of	Watergate Service Area Improvements	Improvements to a wastewater system acquired from a private company in 2020. The project will lead to the closure of a wastewater treatment plant with an expired permit and replacement of aging infrastructure.	\$10,000,000	\$0
098	Pelion, Town of	Main Street Water Main Replacement	Replacement of the final phase of aging and undersized water mains and fire hydrants to improve water quality, provide fire protection and interconnect with Joint Municipal Water and Sewer Commission.	\$873,758	\$0
273	Springdale, Town of	Wastewater System Expansion - Phase II	Phase two construction of gravity sewer within the town to provide sewer connection to homes and a business currently served by individual septic tanks.	\$3,054,793	\$0
175	Swansea, Town of	Utility System Evaluation	Implementation of a comprehensive evaluation of the water and sewer systems, including a detailed system assessment, capital improvement plan, utility rate study and staffing plan.	\$606,655	\$0

**Some titles and descriptions have been edited for clarity.*

Applications for Competitive SCIIP Grants Received September 2022

119	West Columbia, City of	Water System Improvements	Replace aging asbestos cement and galvanized water mains in five locations throughout the city to address water quality issues and reduce work orders.	\$10,000,000	\$0
-----	------------------------	---------------------------	--	--------------	-----

Marion County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
262	Marion County/Marco Rural Water Company	Water Improvements	Construction of a new groundwater well, elevated storage tank and transmission main waterlines, which will address water quality issues, provide capacity to an industrial park and emergency interconnections with neighboring utilities.	\$7,752,313	\$0
279	Marion, City of	Storm Water Improvements	Stormwater improvements on six streets that flood from heavy rains.	\$572,930	\$0
269	Nichols, Town of	Stormwater Resilience	Installation of a new drainage system, retention basin and flood relief infrastructure.	\$9,420,198	\$500,000

Marlboro County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
151	Bennettsville, City of	Water and Sewer Upgrades	Replacement of aging waterlines and water meters and upgrades to gravity sewer lines and manholes to address water quality issues.	\$10,000,000	\$500,000
263	Marlboro County/Marlboro Water Company	New Well and Treatment Facility - Phase II and Stoneaway Road Transmission Line	Construction of a treatment building for a recently installed production well and construction of a new waterline to improve hydraulics and protection capabilities.	\$2,084,193	\$0

McCormick County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
--------	----------------	----------------	----------------------	---------------	---------------

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

265	McCormick Commission of Public Works	Mechanical Barscreen and Raw Water Pump Station Improvements	Replacement of the aging mechanical bar screen at the water pollution control plant and upgrade of aging components at the raw water pump station to meet capacity needs.	\$4,128,219	\$500,000
086	McCormick County	Water Meter Replacement and Storm Water Improvements	Replacement of water meters to increase operational efficiencies and replace three culverts to prevent flooding.	\$2,018,650	\$313,700

Newberry County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
087	Newberry County Water and Sewer Authority	Water Distribution System Upgrades	Upgrade a transmission water main and pump station to fully utilize the new capacity at the Lake Murray Water Treatment Plant.	\$10,000,000	\$500,000
028	Newberry, City of	Major Interceptor Sewer Replacement	Replacement of aging sewer lines to prevent sewer surcharging and infiltration during storm events.	\$10,000,000	\$0
205	Whitmire, Town of	Water and Sewer Infrastructure Improvements	Construction of upgrades to undersized and aging waterlines and refurbish clarifiers at the wastewater treatment plant to maintain water quality.	\$849,953	\$75,922

Oconee County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
118	Oconee Joint Regional Sewer Authority	Collection System and Wastewater Treatment Facility Rehabilitation Project	Rehabilitation of sewer collection system and portions of the wastewater treatment facility to address a DHEC consent order.	\$9,599,975	\$0
092	Pioneer Rural Water District	Water Treatment Plant Advanced Oxidation Improvements	Installation of advanced oxidation treatment at the water treatment plant to treat harmful algae, address taste and odor issues and prepare for contaminants of emerging concern.	\$8,500,000	\$0
011	Salem, Town of	Waterline Replacement	Replacement of waterlines and fire hydrants to improve pressure and fire protection.	\$2,165,685	\$0

*Some titles and descriptions have been edited for clarity.

Applications for Competitive SCIIP Grants Received September 2022

094	Seneca, City of	Highway 130 Elevated Water Tank	Installation of a new elevated water tank and waterline to replace an existing hydro-pneumatic tank, increasing capacity and reliability.	\$6,995,475	\$0
096	Walhalla, City of	Water and Sewer Improvements	Replacement of aging waterlines and a booster pump station as well as the rehabilitation of aging gravity sewer trunk lines, manholes and aerial sewers.	\$10,000,000	\$500,000
006	West Union, Town of	Hwy 11 and Neville Street Waterlines	Replacement of aging waterlines along Hwy 11 and Neville Street to improve water quality.	\$433,707	\$0
176	Westminster, City of	Sewer Collection Improvements	Construction of gravity mains and manholes to replace old, problematic sewer mains.	\$3,929,180	\$0

Orangeburg County

App. #	Applicant Name	Project Title*	Project Description*	SCIIP Request	State Request
124	Bowman, Town of	Wastewater Improvements	Extension of sewer service from the wastewater treatment plant to I-26 to serve existing commercial sites and residences and provide capacity for further commercial and industrial development.	\$2,973,992	\$500,000
213	Branchville, Town of	Water and Sewer Viability Plan	Undertake a viability study for the water and sewer utility including updating maps, creation of a water system computer model, sanitary sewer evaluation study, asset evaluation, rate structure analysis, infrastructure condition assessment and master planning of capital improvement projects to meet future needs.	\$521,820	\$0
294	Elloree Water System	Water System Rehabilitation	Refurbishment of an elevated water tank, refurbishment of an existing well and replacement of an existing waterline to address a DHEC consent order.	\$1,748,610	\$0
